- |  |  |
|--|--|
| • Queen bed                                | • 200 Watt slim-line solar panels      |
| • 110 Litre Water tank with gauge          | • Diesel "Webasto" hot water system    |
| • Lights: All LED lights                   | • 1 Under-body storage drawer          |
| • Awning: Pull-out 4x4 style – 2.5m x 2.5m | • Tailgate storage bin                 |
| • Removable Kerosene cook top              | • Portable toilet + 1 set of chemicals |
| • 100 Litre 12 V Marine fridge / freezer   | • Collapsible cubicle shower           |
| • 120 Amp. Deep cycle battery              | • Drop down table                      |
| • Cigarette style power outlets            | • Internal 12V water pump              |

The Traytek has a solid pop-top roof and drop-down tailgate section. There is a "Day-use" and "Night-use" functionality incorporated in the way of a lift-up bed frame to access the lounge (and storage) during the day and for night time the bed drops into place for a good night's rest, the bed is in a north-south so you don't have to climb over anyone to get into bed. The lounge is a two-seater with a pull-out table and access to the external storage bin under the seat by lifting the seat cushion. The kitchen cabinets are open storage with a "smart-sink" and bench space for internal cooking when needed. The campers solid roof is an easy one person lift into the open position and just as easy to lower again. The rear tailgate is operated by a built-in winch for quick and easy access. The camper also comes with 4 legs to allow for free-standing off the vehicle and they invert to form the lock-down points for transit.

## Australia's No.1 Slide-on Camper

The Trayon Camper range have been exploring all parts of Australia and the world since 1994. These campers will go anywhere your 4x4 can go thanks to its legendary and proven toughness aided by its light-weight design as well as its low profile and centre of gravity. Taking only 3 minutes to erect for camp, it is a quick and easy (1 person) operation for the user to start enjoying the outdoors. Each camper has the ability to free-stand either in camp or for storage to free up your vehicle for normal everyday use. The campers are independent and non-reliant on the vehicle to give you the freedom of choice to camp either on the vehicle or off on its own leg.

With a practical layout and proper utilisation of weight distribution techniques, the Trayon Camper range will not inundate your 4-WD allowing for full off-road use without compromising traction/braking/steering by placing the majority of the weight of the camper as far forward as possible to position the weight in front of the rear axle of the vehicle – not behind it.

## No Tow - Way to Go™

Aussie travellers love the light-weight, water and dustproof camper with all the comforts of home for its compact layout and its ease of use but the fact that you don't have to tow anything is what really makes the Trayon Camper range so popular among campers and explorers. You can go further, use less fuel and sneak into tighter spots compared to what you would have towing a camper trailer. The Trayon Camper is made primarily from non-welded Aluminium (not Fibreglass like most other campers) allowing for a light-weight and super-strong flexible structure that comes with a **10 year structural warranty**.
